

NOVEMBER 18TH, 9.30 -12.30 CET

DIGITAL LEARNING IN THE EXPERIENCE OF ROSKILDE BUSINESS COLLEGE

Online webinar

This training and workshop initiative is part of the VIMOINVET Erasmus project for the exchange of good practices in the field of transnational blended and virtual mobility.

The project involves partners from 5 countries (Italy, France, Spain, Denmark and Serbia). In the framework of the project, the Roskilde Business College will provide a training related to the topic of digital learning (use of the Moodle platform, digitalization of modules in the context of vocational training).

This experience has found an important incentive in Denmark due to the historical moment and the pandemic. But the Roskilde Business College will show the methodological framework of digital learning and its possible declinations also in a post-pandemic context designed for the near future, linked on one hand to the promotion of citizenship skills and on the other hand to the "transnational" potential that such an approach may have.

PROGRAM

Online webinar

November 18th, 9.30 -12.30 CET
